

Abdelghafaar Nashaat Abdelghafaar

Full Stack Web Developer

Address: Nasr City, Cairo

Mobile: +201126565444

Email: abdelghafaarnashaat@gmail.com

GitHub: [@AbdoNashaat](https://github.com/AbdoNashaat)

LinkedIn: [@abdelghafaar-nashaat](https://www.linkedin.com/in/abdelghafaar-nashaat)

Military Status: Exempted

OBJECTIVE

Software engineer with experience building secure, scalable web applications and APIs. Skilled in designing databases, implementing RESTful services, and developing responsive user interfaces. Beyond technical expertise, I bring strong communication skills and proven experience working in diverse teams, coordinating tasks, and ensuring a smooth workflow to deliver projects efficiently and effectively.

EDUCATION

Information Technology Institute (ITI)

JULY 2025 — JAN 2026

Full-Stack Web Development with PHP

Graduation Project Grade: Excellent

Eastern Mediterranean University (EMU)

SEP 2018 — MAY 2024

Bachelor's degree in Computer Engineering

Graduation Grade: 3.1 CGPA (Honor)

Graduation Project Grade: A (Excellent)

EXPERIENCE

Full-stack Web Developer — Hala Ticaret Ltd. (Northern Cyprus)

Tech Stack: HTML5, CSS3, JS, Bootstrap, Firebase

May 2024 – July 2024

- Built a restaurant website that increased the total number of orders by 10%
- The system supported product listings, user accounts, and ordering functionality with discounts, special offers, order tracking updates, and multiple languages support.
- Serverless for easier maintenance and management.
- Developed a clean minimalist UI using HTML5, CSS3 with bootstrap and JS for the best customer ordering experience.

Systems Administrator — MEP (Cairo, Egypt)

Tech Stack: Google workspace, automated scripts, NAS, Pulseway

Sep 2024 – Dec 2024

- Administered server environments, ensuring 99% uptime for business applications.
 - Managed network infrastructure, including the configuration and troubleshooting of switches, routers, firewalls, and VPNs to ensure secure remote access.
 - Data archiving and backup strategies, implementing automated recovery protocols to ensure business continuity and data integrity.
-

PROJECTS

Dawarly — Freelance Job Matching Platform — ITI (New Capital, Egypt)

Tech Stack: React, Redux, Nodejs, Laravel, Microservices, PostgreSQL, RAG

Embedding, AWS (EC2, S3), GitHub Actions, Docker

Dec 2025 – Jan 2025

- Designed and built a semantic job recommendation app that matches freelance workers to postings using AI-powered text embeddings (1024-dim vectors).
- Implemented automated job ingestion from freelancing platforms using APIs and scraping, and batch embedding via Hugging Face Inference API.
- Created a vector-based search system with pgvector (HNSW index) for cosine similarity matching, hybrid scoring (semantic + keyword bonus + recency boost), and tiers.
- Developed multi-profile support allowing users to store multiple skill sets/experiences, each with its own embedding, and select active profile for matching.
- Deployed on AWS EC2 with Github actions with scheduled cleanup of old jobs to maintain database freshness and performance.

Ketabi — Online Bookstore Marketplace — ITI (New Capital, Egypt)

Tech Stack: MEAN, RAG Embedding, Swagger, AWS, Github actions

Oct 2025 – Nov 2025

- Collaborated in a 5-member team to build a full-stack bookstore marketplace.
- Role based access control (Customer, Admin, Seller) with dashboards for each role.
- Implemented publisher order handling and sales tracking for multi-vendor functionality.
- Developed and optimized back-end modules for cart management, order processing, checkout integrations (Stripe, Paymob, PayPal), and coupon systems.
- Built an AI powered chatbot that had access to the books using a RAG system to suggest books to the customer based on his preferences.

- Built secure payment flows and webhook logic for post-payment order updates, stock management, and refund processing.
- Managed version control, code reviews and conflicts with team members on GitHub.

Soukori, E-Commerce Website — ITI (New Capital, Egypt)

Tech Stack: JS, HTML5, CSS3, Bootstrap, Firebase, GitHub, Stripe

Sep 2025 – Oct 2025

- Built an e-commerce platform for a clothing brand.
- Supported product browsing, cart management, profile management, order tracking, stock updates, admin dashboard and secure checkout.
- Integrated Firebase Firestore for real-time data (products, orders, users, reviews).
- Implemented webhooks on firebase functions to handle payment, orders, and stock updates
- Designed a responsive UI with Bootstrap and JS for seamless user experience.
- Deployed using Firebase hosting with Firebase functions for webhooks.
- Managed version control, code reviews and conflicts with team members on **GitHub**.

EzRecycle Mobile Application (Graduation Project) — EMU (Northern Cyprus)

Tech Stack: Flutter, Dart, Firebase, GitHub

SEP 2023 – MAY 2024

- Led a 4-member team as product manager & lead developer.
- Designed and implemented a cross-platform mobile app to encourage recycling.
- Built core features including authentication, database integration, and tracking recycling stations, map directions, points & more.

Embedded Baby Incubator System (Course Project) — EMU (Northern Cyprus)

Tech Stack: Arduino, Node-RED

JAN 2023 – SEP 2023

- Developed an Arduino-based system with sensors, alarms, and real-time dashboards to monitor infant incubators.
- Implemented data logging and visualization using Node-RED.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Php, SQL, HTML, CSS

Frameworks & Libraries: Node.js, Express.js, Laravel (Livewire, Blade), Angular, React

Databases: MongoDB, MySQL, PostgreSQL, Firebase

Tools & Platforms: GitHub (Version Control, Actions, Guards), Firebase, AWS, Docker

Concepts: RESTful APIs, RBAC, Authentication & Authorization, Webhooks, Searching & Filtering, Server-side rendering, Database Design & Optimization, RAG, Use Cases, Testing
